

## POSTER CONTENT

### Workshop Title

#### Build Your Own AI Agent

*'A Hands-On Hour of AI Workshop'*

### Organized By

#### UDST ACM Student Chapter

Part of **Hour of AI & CSEdWeek**

### What Is This Workshop About?

Learn how AI agents work

In this beginner-friendly, hands-on session, you'll **build a real AI agent** using visual, no-code tools and understand how AI systems think, plan, and act.

### What You'll Learn

- What AI agents are and how they differ from LLMs
- How AI workflows are structured
- Core components of an AI agent (input, logic, tools, output)
- How to design and test a simple AI agent
- Practical and responsible use of AI for students

### What You'll Build

#### Study Planner AI Agent

An AI agent that:

- Takes your courses, deadlines, and available time
- Prioritizes tasks intelligently
- Generates a personalized study schedule

### Who Can Attend?

- Open to **all UDST students**
- **No prior AI or coding experience required**
- Perfect for beginners and non-CS majors

### Workshop Details

- **Duration:** 1 Hour
- **Format:** In-person, hands-on
- **Tools Used:** Flowise AI (visual, no-code)
- **Seats:** Limited (15–25 participants)

## What You'll Leave With

A working AI agent

Clear understanding of AI agents vs ChatGPT

Confidence to explore AI tools independently

A foundation for future AI projects
